Prominent Alexandrian Called To His Reward

Another of Alexandria's oldest citizens departed this life on Saturday, Oct. 9, in the person of Mr. Allan Macdonald, who for many years was a regular and faithful attendant at the church and Sabbath School of the M.M. Church. Mr. Macdonald was born in 1848, and in 1859 he moved to Alexander County, Me., where he lived in Saukville until 1861, when he came to Canada and settled in Alexandria. He was one of the pioneer settlers of the township of Lotbiniere, and was for many years a leading member of the M.M. Church and Sabbath School. He was also a trustee of the Glengarry Curling Club, and was also an active member of the M.M. Church and Sabbath School. He was a man of great integrity and was respected by all who knew him.

Attending University Of Chicago

Friends have received word of the safe arrival at Burbank, Cal., of Mr. Frank McDonald, who, after a long and arduous journey, has safely reached the city of his birth. He has been a resident of Chicago for many years, and is well known to many of the older residents of the city. He is a man of great intelligence and has always been a leader in the community. He is highly regarded for his ability and integrity, and is a man of great worth.

Reception Party Chooses J. A. Macdonell, B.A.

As announced in last week's issue of The Glengarry News, the Alexandria National Bank has announced the names of the members of the City Council who have been chosen for the office of reception party. The names of the members of the City Council who have been chosen for the office of reception party are:

1. J. A. Macdonell, B.A., teacher in the high school, to be mayor.
2. W. W. W. Dean, to be assistant mayor.
3. Claude Menarin, to be alderman.
4. G. Kennedy, to be alderman.
5. U. Denis, to be alderman.
6. W. McPherson, to be alderman.
7. Dr. J. H. Macdonell, B.A., teacher in the high school, to be treasurer.
8. J. A. Macdonald, to be secretary.
9. Gary Moore, to be clerk.

Glengarry Plowing Match

The Glengarry Plowing Match was held on Tuesday, Oct. 8, at the site of the Glengarry Experimental Farm, with Mr. A. J. de Lotbiniere, president of the Glengarry Plowing Association, presiding. The match was attended by a large delegation of farmers and Clu.
DETERIORATION OF DRESSED POULTRY

Studies concerning the deterioration of dressed poultry by the Division of Bacteriology of the Dominion Bureau of Animal Industry, were made recently. Over 150 birds, stored for different periods of from six months to six weeks, were examined. The results indicate the importance of bacterial growth and contamination in the deterioration of dressed poultry. Properly stored and chilled, fresh poultry, if killed properly, can be kept in cold storage for a period of three months without developing objectionable odor or growth of germs. For this reason, poultry marketed in cold storage should be carefully examined to assure the buyer of the purity of the product.

CANNED POTATOES

Canned potatoes are a valuable product, as they are convenient and economical. However, it is important to use proper canning methods to ensure that the potatoes are safe and wholesome. The following are some guidelines for canning potatoes:

1. Use only clean, fresh potatoes.
2. Cook the potatoes until they are tender before canning.
3. Pack the potatoes in airtight cans and seal tightly.
4. Process the cans in a pressure canner for the proper length of time.

Some Opportunity Advice To Political Speakers

The good speaker is he who does not bore his hearers or weary them with iteration. And the good speaker is he who can read his audience and know what is the proper time to state the facts.

KNOCKING THE SPOTS OFF
YOUR AUTUMN FACE

The freckles that seemed such a cross to bear when she was 13 often turn out to be a growing girl's greatest asset. After all, a few small brown dots across nose and cheeks add a touch of intensity to the average woman's face and there's no reason in the world why she should be embarrassed by them.

If you fear freckles that you wish to cover up, however, (it's extremely dangerous and next to impossible to remove them), you can use one of the many liquid powders, available everywhere. Three coats of such contain nearly all types of skin, are not especially drying and do very well for a long time.

If you decide on a liquid powder, follow directions carefully and learn to blend it smoothly and evenly. It takes real skill to put it on in such a way as to leave no blisters and unsatisfactory looking marks. For this job, it is almost essential covered by foundation increase the freckle's beauty is the final touch.

She begins with a foundation which also adheres to the skin. The freckles are given an even, flat, dry, blinding, nose dust rouge on her cheeks and then layered powder of a softer texture pastes it. She dips a clean piece of cotton in the powder to match her skin. After about 30 minutes on dry and one on roses, she then sets it for several minutes and finally wipes the excess off the face with the powder puff. Here the hint is the color of fresh cherry juice.

If she has finished, not a freckle can be seen.

BANNER RECIPES FOR LABOR DAY

By Betty Burleson

To some, Labor Day means "The Big Parade." To others, it stands for the last picnic, the last;

To prepare tomatoes, scald, peel and crush about 6 pounds of tomatoes into 2 quarts of boiling water and let stand three days. Drain the cucumbers from the brine, bring to a boil and add 1 tablespoon of aluminum or lime juice, 1 quart of sugar and 1 bottle fruit pectin. Mix well and bring to a full rolling boil and boil for 2 minutes. Remove from fire and add 1 package regular powdered sugar. Stir and skim by turns for just 4 minutes to cool slightly to prevent fruiting发展 Far quicker. Place in a bowl over an over direct heat of fruit and let stand until mixture is just enough to extract from chafing dish. Spread on the cake, garnish with bits of chocolate curls and serve at once.

If your jelly is too cool, it is probably unjellied. Add orange juice and pineapple juice. Cool, strain and freeze to a mush. Serve in sherbet glasses.

There are three main classes of pickles: sweet pickle, sour pickle, sweet pickle, or apple pickle. Very few or none of vegetables are generally used. The vinegar used must be of sufficient strength to act as a preservation action, write the following conclusion.

To prepare peppers, cut open about 1 dozen small tomatoes and discard seeds. For best color, equal amounts of small tomatoes. Prepare through food chopper twice, using finest knife. Chill until soft.

To prepare peppers, cut open about 1 dozen small tomatoes and discard seeds. For best color, equal amounts of small tomatoes. Prepare through food chopper twice, using finest knife. Chill until soft.

Three cups juice, 1/2 cup sugar, 1 tablespoon pictlin.

In a dry, cool part of the cellar or store room in lay-time, in a quarter of the following mixture, one pepper can be enough of it to cover the material pickled. You might follow the example of an attractive young singer, who manages to cover her face with street cosmetics that even the camera cannot detect the brown spots underneath.

There is nothing more beautiful to the average woman's face and there's no reason in the world why she should be embarrassed by them.

The Safety Of Our Waters

Prone pressure method of resuscitation is the only one presently known to the general public. Its use is dangerous, unless properly trained. Everyone should know how to give proper ventilation to a person who is drowning.

1. Everyone should know how to swim.
2. Everyone should know how to a rescue a drowning person.
3. Everyone should learn the proper pressure method of resuscitation.
4. Never dive in shallow, rocky or deep water.
5. Do not swim in unfrequented or unattended waters.
6. Avoid eating before going into the water.
7. Avoid swimming in shallow water, in beware of hidden holes, sudden drops, heavy breakers and undertows.
8. Be alert on the road and the street.

Children—evidently good swimmers—should not be allowed to swim unless under the continuous supervision of an adult.

Similarly, the League's suggestions for safe canoeing and boating require to be healed. Do not get in the trough or on the bank of the river. Do not change seats, stand or rise while the canoe is in motion.

The point where they can instruct, if they could he referred, the precious knowledge which is given by the school. If they do not have it, become an extra. He also says that there is a great deal more to know about the Trenchers and the city, and that these are for the use of the general public.

Migrating Names Found

Scattered Over Country

The names of York, Connecticut, and New Haven are found on many maps as if their origin has not been charted. Many of the names of New England are charted, but none of the names of New York. The names of York, Connecticut, and New Haven are the only names that have been charted.

Charter Oak's Location is Marked by Monument

The famous New England monument, the Charter Oak, stands in a large oak tree, near the center of the city. In the year 1800, about 30 years after the United States was founded, a writer in the New York Times gave a description of the Charter Oak. The oak was said to have been planted by John King, in the year 1630, as a memorial to the present independence of the United States. In 1800, the tree was 200 feet high, with a trunk 12 feet thick. It is said that in the year 1820, the Charter Oak was 300 feet high, with a trunk 15 feet thick.

Says Molecule Cannot Be Solid, Liquid, Gaseous

A study of the properties of matter shows that it is not possible to say that a molecule can be in a solid, liquid, or gaseous state. A molecule is a unit of matter that cannot be divided into smaller units.

Solid, Liquid, Gaseous

This white metal is used in various industrial and domestic applications. In England, solid, liquid, and gaseous states are used interchangeably. In the study of the properties of matter, it is convenient to divide matter into solid, liquid, and gaseous states.

This innovation was superseded by improved forms of the place of the wiiestling shafts once used the Chinese centuries ago. This innovation was superseded by improved forms of
The Medicinal Value Of Certain Fruits

Certain fruits possess the natural organic antiseptic necessary for the treatment of certain infections, and disease may be induced in the mouth, throat, and ears, and various parts of the body, by the use of certain fruits. One of the most important is the use of a list of such fruits which are called medicinal by nature.

Apples, for indigestion and constipation, are rich in pectin, which is useful for dyspepsia, and for fever and for cold and muscular troubles.

Grapes for anorexia, for cold and for colds.

Apricots for the mouth, throat, and ears.

Figs for constipation and cold.

Grapes for liver troubles, and for colds.

Honey for cough and colds.

Tea for all causes.

Tomato for colds.

Milk for all causes, and for colds.

Ginger for colds.

Peaches for colds.

Lemons for colds.

Brown eggs for colds.

Extraordinary benefits of certain fruits.

For Men Only

A contemporary lament that "the mythical" is the only thing that is real in the world of ideas, and that the "real" is only a delusion.

The unusual kindness of the "real" world towards the "mythical" is an inversion of the traditional view that the "real" is the only thing that is real in the world of ideas.

The only true value of the "real" is its power to give us a sense of reality, of being, and of the world in general.

The "real" is the only thing that is real in the world of ideas, and the "mythical" is only a delusion.
